Niederweningen, 27 March 2014

Major new order for municipal vehicles from the city of Moscow

In an international call for tenders put out by the city of Moscow, Bucher Municipal has again won a major order, on this occasion for 609 sweepers, 275 snowploughs and 163 spreaders for winter maintenance. The order is worth a total of CHF 53 million. The order will be processed in the course of the current business year.

This major order from the city of Moscow is part of a large-scale tendering process covering a wide range of infrastructure equipment. Key factors influencing the decision to award the contract were the high quality of the sweepers and winter maintenance equipment already supplied, the good price-performance ratio and the ability to deliver major orders professionally and on schedule. Bucher Municipal's flexible production capacity in Switzerland, Great Britain, Latvia and Italy will enable it to meet the short delivery deadlines.

The whole order will have an impact on sales and earnings in the current year and it will ensure high capacity utilisation. As a result, the division also has an improved outlook. Bucher Municipal is looking forward to a marked increase in sales and operating profit for the 2014 business year.

Bucher Municipal is the European and Australian market leader in municipal vehicles for cleaning and clearing snow from public and private spaces. It offers a wide range of compact and truck-mounted sweepers, winter maintenance equipment and refuse collection vehicles.
